Ordering details:		
GY K-UMI	Disposable Manipulator	\$540.00/box 12

ExEm® Foam Kit has been developed for ultrasound assessment of tubal patency

Fallopian tube abnormalities account for up to 40% of female sub-fertility

Assessment of tubal patency is one of the first steps in fertility investigations

The ExEm gel has been specifically developed for gynaecological intracavity ultrasound imaging and is CE marked for this purpose

Wallace®

wallace™

Amniocentesis Needles

This is a high quality specifically designed for optimum handling and confidence of tip placement during amniotic fluid sampling.

Spiral engraving for enhanced visualisation

Stylet to prevent blockage

The single use Amniocentesis Needles are provided in individual sterile packs for the application of amniotic fluid sampling. The needle tips have spiral engraving to provide clear visibility under ultrasound guidance. Each needle is provided with a self locating stylet to ensure the lumen is free of blockages once the tip is in place.

When your family is complete, choose Essure®

Essure is a gentle, permanent contraceptive procedure that works naturally with your body — without cutting, hormones or the risks of getting your tubes tied.

Contraceptive failures per 1000 women at year 3:

Wallace®

Vaginal Speculum

The Wallace® disposable vaginal speculum allows for single handed locking in multiple positions. The ergonomic design gives maximum patient comfort whilst providing optimum visualisation of the cervix.

The single use vaginal speculum from Smith Medical International offers a real alternative to traditional metal types. Not only does the device provide all the benefits of avoiding cross infection but it has also been designed to withstand 5kg of load applied to the beak tips. The Wallace® disposable speculum provides strength without risk.
